Installation manual VH-9680
1. Unfold the solar panel on the jib, the back-jib or on top of the basket.
2. Take out the brackets, strip and U-bolts.
3.
Put the strip (Pos. X) on the side of the solar panels, covering both panels.
4. Put the brackets on the edges of the panels, and extend them so they fit (marked red). The distance between the brackets is depending on the size of the basket.
5. Remove the bold and nut (marked red) and fold the bracket in a vertical position. Do this for both brackets.
6.
Put the bold and nut back in the marked hole and screw tight. Do this for both brackets.
7. Put the diagonal bracket (Pos. Y) in between the 2 rings, and screw the nut tight.
8. Place the solar panel on the outside of the basket. Let it rest on the 2 U-formed strips (Pos Z).

Now lift it up a bit and put in the U-bolts and screw them tight.

Connect one side of the safety cord to the handle of the solar panel and the other side to the basket or trolley.
